

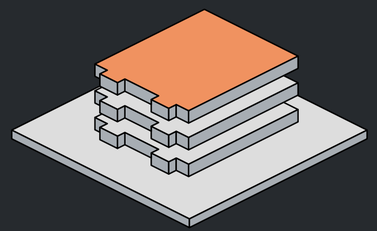
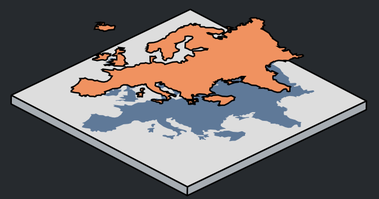
Not another European battery promise.

Altris is a standard, built from the chemistry up and ready to integrate into supply chains today.



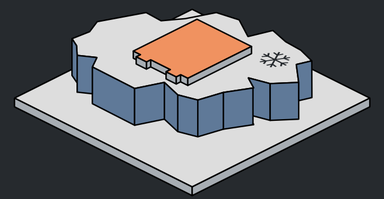
Industrial pilot scale

Our Uppsala facility produces industrial reference cells — the same cells your manufacturing line will run. No lab prototypes. No empty promises.



100% European Origin

Iron, salt, wood, and air. No cobalt. No nickel. No dependence on conflict minerals or single-source geographies.



160Wh/kg at -40°C

Engineered for operational reality. Exceptional cycle life, best-in-class safety, and cold-climate performance that other chemistries cannot match.
